

ENVIRONMENTAL POLICY

The aim of Czech Airlines Technics in all its activities in the field of aircraft maintenance is to minimize the negative impacts of its business activities, products and services on the environment, the health of employees and the public at the Prague Ruzyne Airport.

The Company's management and its employees are aware of their responsibility to protect the environment. Therefore in our activities we will seek to comply with the following principles:

- Comply with all applicable legislation requirements related to the environment.
- Monitor and evaluate our activities in terms of impact on the environment, and reducing of the specific energy consumption.
- Use appropriate technologies and procedures with aim to prevent or permanently reduce the environmental pollution, including minimization of the waste and the optimal using of natural resources.
- To reduce the quantity of hazardous chemicals and if possible to substitute them with the more environmentally friendly chemicals.
- Communicate with our partners and customers in the area of influence of our activities, products and services on the environment.
- Work on the reducing of our impact on the environment with our suppliers, authorities and other partners and openly communicate.
- Continuously educate CSAT employees to constantly increase their awareness and knowledge needed in environmental aspects.
- Maintain, develop and continually improve the CSAT Environmental Management System.
